

Table 1. Benchmark Breakdown

1a Workbook modules included

Two benchmark dataset tables and two human-scoring tables

Module	Type	Source	Rows	Models	Evaluations
Bar exam data	Dataset	Bar exam	868	22	19,096
CN judgment data	Dataset	Real cases	76	22	1,672
Human bar exam	Human scored	Bar exam	80	22	1,760
Human CN judgments	Human scored	Real cases	10	22	220

Evaluations = rows x model groups; all four modules use 22 model groups.

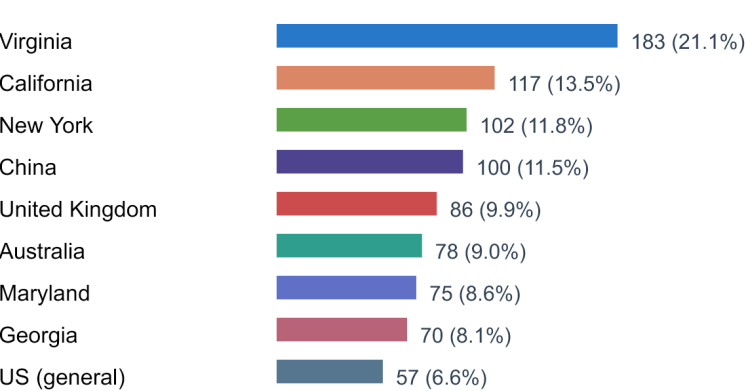

1b Benchmark source composition

Rows and response-level evaluation counts, split by source.

Measure	Source share	Bar exam	Real cases	Total
Dataset rows	91.9% 8.1%	868	76	944
Human rows	88.9% 11.1%	80	10	90
Dataset responses	91.9% 8.1%	19,096	1,672	20,768
Human responses	88.9% 11.1%	1,760	220	1,980

1c Bar-exam jurisdiction coverage

Record-level jurisdiction split for Bar_Exam_Multimodel.

1d Legal-domain distribution by source

Within-source percentages; real cases show all observed domains.
